

## At GLS... *Black Friday* is getting greener!

For us at GLS, caring for the Planet is one of the core values that supports and accompanies everything we do, **at all times of the year**. Climate neutrality is an ambition to which we are deeply committed. We currently offset CO2 emissions produced through **four active projects**: in **Peru**, the project protects an area of 100,000 hectares and helps local communities to manage it in a sustainable way; in **Brazil**, the project covers 148,000 hectares and helps to prevent the illegal logging of the Amazon rainforest. The other two programmes are related to green energy production: both in **India**, one deals with the supply of energy through a 100 MW

solar plant, while the other involves the construction and operation of a 40 MW wind farm with substantially reduced dependence on fossil fuels.

But that's not all: we are working on making our fleet more and more environmentally friendly! Currently **10%** of our vehicles are zero and low emission, the intention is to reach **25%** by 2025. Even at peak times like **Black Friday**, we do not give up the use of electric vehicles and LNG vehicles.
